

Iwata Kustom Hi-Line TH Airbrush

The first airbrush to create both round-pattern and fan-pattern sprays, the Kustom Hi-Line TH stands alone among its peers. Triggering the imagination of auto-body touch-up and Kustom painters, the Kustom TH delivers unprecedented fan pattern control with a minimum of overspray — giving it a unique advantage over mini touch up guns.

The fan-pattern air cap produces an oval spray pattern — perfect for creating smoother blends, gradations and backgrounds because the paint is atomized more consistently across the entire width of the spray. Great for small areas such as chip repair, fender wells, door jams and other hard-to-reach areas.

The Kustom TH also features an interchangeable round-pattern air cap, producing a round spray pattern with concentrated spray at its center, which is preferable for freehand graphics and fine line detail.

These features, and more, distinguish the Kustom TH as the ultimate airbrush for creative versatility.

Unique high-precision fan-pattern spray-head system;
 • "Fan-Pattern" air cap (requires 1 HP or larger compressor)
 • "Round-Pattern" air cap

Pistol-Grip Filter included

Every Iwata Kustom Series Airbrush features the Iwata-Medea Pistol-Grip Filter.

Kustom painting takes pole position with the new Iwata Kustom airbrush series that sports large cups and shines in atomizing solvent-based paints. Teflon packing, large cups, pre-set handles and taller triggers distinguish these airbrushes as Kustom.

Iwata Kustom Revolution TR Airbrush

Triggering the passion of spray-gun users, the Kustom Revolution TR airbrush proves easy to use. The long trigger provides commanding control of the airbrush spray.

K9400 Features:

- 0.30mm nozzle
- Teflon needle packings
- Large 3/4 oz. (21ml) gravity fluid removable cup
- Spray-gun trigger design
- Pre-set handle
- Pistol-Grip Filter included

Iwata Kustom Micron CM Airbrush

The MAC Daddy of all airbrushes, the Kustom Micron CM is framed around the Iwata Custom Micron airbrush. The new Kustom Micron CM airbrush provides extreme control of ultra fine-line spray, silky-smooth atomization and ultimate paint-flow control with hand-tuned, hand-adjusted performance. Iwata Micron airbrushes are world-renown as the professional's choice for the utmost of fine line detail.

K9000 Features:

- 0.23mm "Matched Head System"
- Teflon needle packings
- Large 1/2 oz. (14ml) gravity fluid cup
- Taller trigger for extreme control of trigger action and paint flow
- Pre-set handle
- MAC valve for precise air pressure control
- Pistol-Grip Filter included

Iwata Kustom Hi-Line CH Airbrush

A preferred airbrush for users who need ultimate control of fine-line work and medium background spraying, the Kustom Hi-Line CH boasts a MAC valve that supplies precise air control to the head of the airbrush for ultimate control.

K9100 Features:

- 0.30mm nozzle
- Teflon needle packings
- Large 1/2 oz. (14ml) gravity fluid cup
- Taller trigger for extreme control of trigger action and paint flow
- Pre-set handle
- MAC Valve for precise air-pressure control
- Pistol-Grip Filter included

Iwata Kustom Eclipse CS Airbrush

The workhorse of the Kustom line, the Kustom Eclipse CS features a large general-purpose nozzle/needle combination. Still maintaining fine-line control, the Kustom Eclipse CS creates wide background sprays with fine atomization and control. Designed to spray metallic, pearlescent and base coat paints.

K9300 Features:

- 0.35mm nozzle
- Teflon needle packings
- Large 1/2 oz. (14ml) gravity fluid cup
- Taller trigger for extreme control of trigger action and paint flow
- Pre-set handle
- Pistol-Grip Filter included
